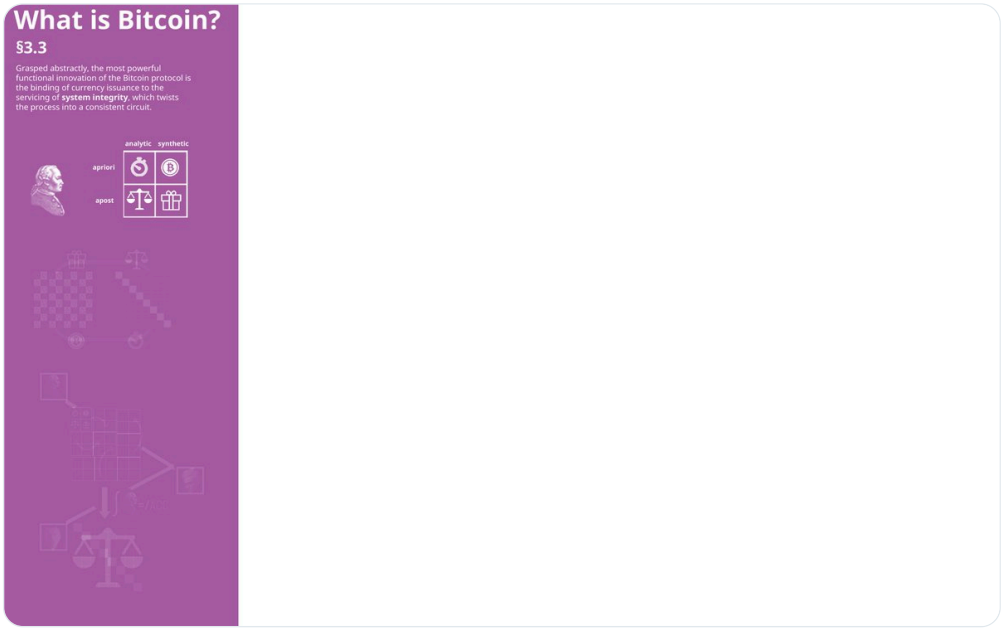
What really is Bitcoin?
§3.301

We begin our critique from the view that what is at stake in modernity is a resolution to Kant's analytic-synthetic distinction, encrypted in the history of philosophy until the solution in a "Bitcoin" matrix

#cryptocurrent #cryptocene #nickland



What is Bitcoin?
§3.3
Grasped abstractly, the most powerful functional innovation of the Bitcoin protocol is the binding of currency issuance to the servicing of system integrity, which twists the process into a consistent circuit.
analytic
synthetic
apriori
apost

§3.3011 The critique examines the particular philohistorical progression through the reformulations of this Kantian matrix that lead to the contemporary solution,what makes this solution unique ,and if it indeed escapes the critiques of [post]modernism

§3.3012

The first claim is the history of philosophy has been leading up to this point, whether by obfuscation, rejection, ignoring or reconstructing diffusely throughout their various texts the problematic and solution to the Kantian matrix.

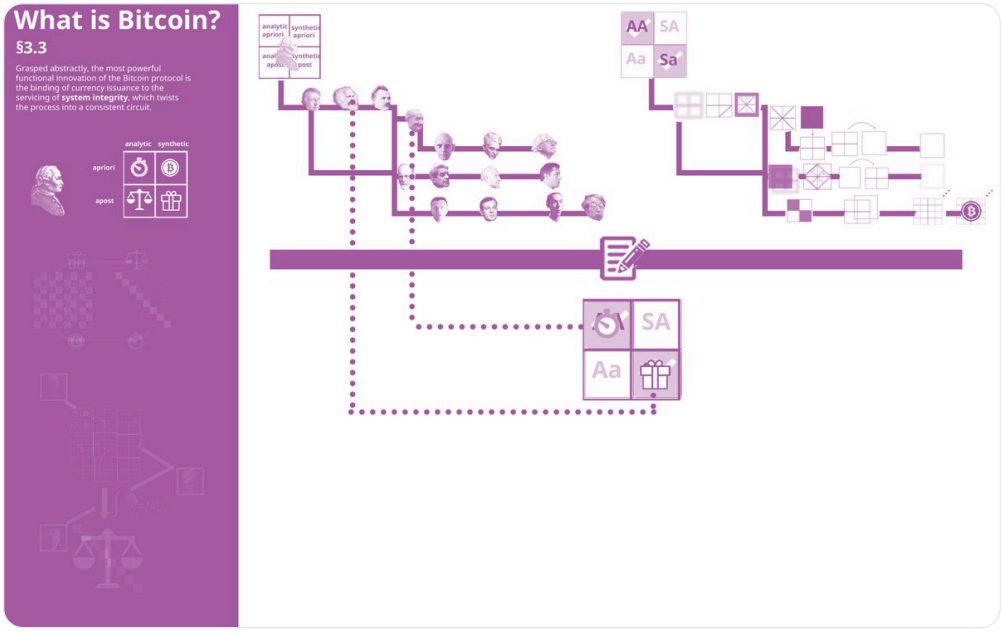
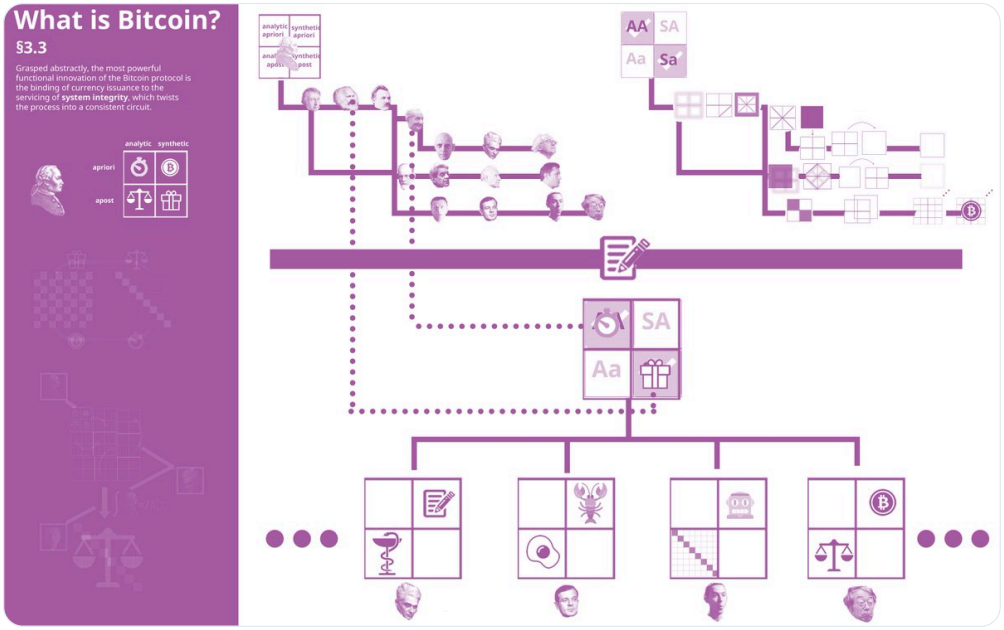
§3.3013

What can be traced from this time travel is the positioning of Time as the key to decrypting that which hinders or complicates solutions to the question of production: Being, Capital, Geist, etc. Time appears threaded analyticaly apriori against the production of material



§3.3014

Regardless of the challenges to make sense or verify validity of the question, cryptic solutions that bridge the matrix through the synthetic apriori and the analytic aposteriori can be decoded from the work of the philosophical lineage as a completion of the matrix



§3.3015

The solution to Kantianism (the kantian matrix) is a solution to Capitalism and a completion of the system of german idealism😉

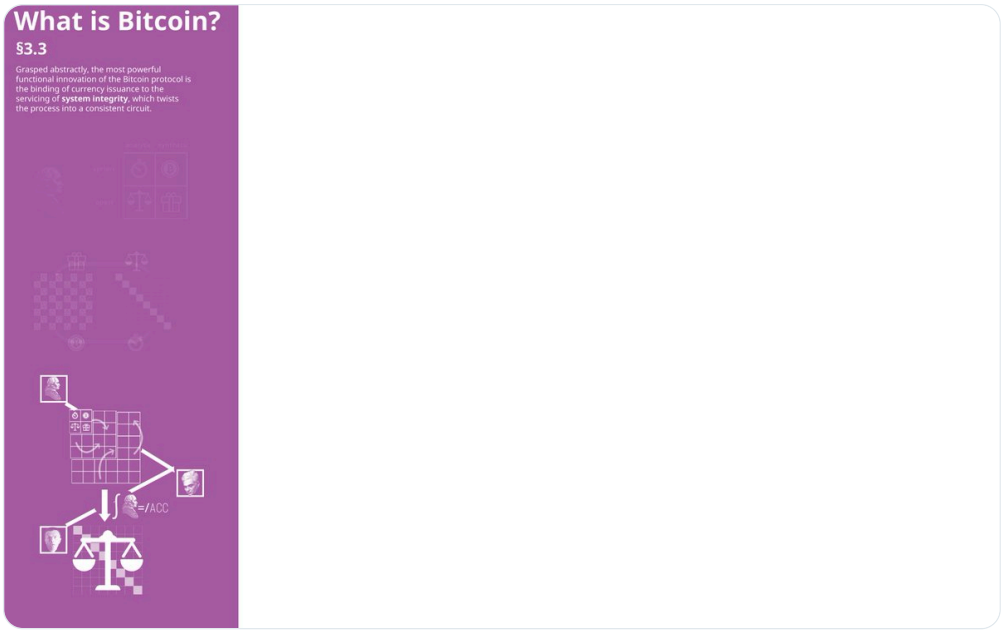
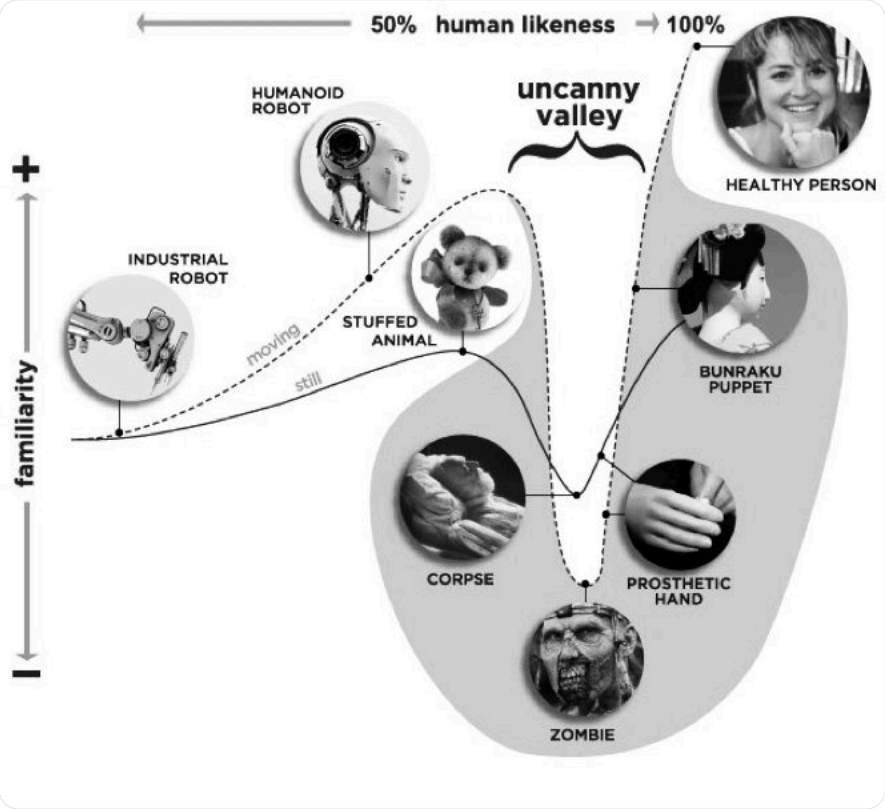
The Uncanny Valley of philosophy



What is Bitcoin?
§3.3
Grasped abstractly, the most powerful functional innovation of the Bitcoin protocol is the binding of currency issuance to the servicing of system integrity, which twists the process into a consistent circuit.

An excellent introduction to the concept of the uncanny valley by @cgwtf

vimeo.com/237568588



§3.3021
History's evasions, obfuscations, reformulations of the Kantian matrixial problematic before a materialised solution is a homeric passage, a christ descent into hell and ascension, a maglev train through the uncanny valley to the Outside.

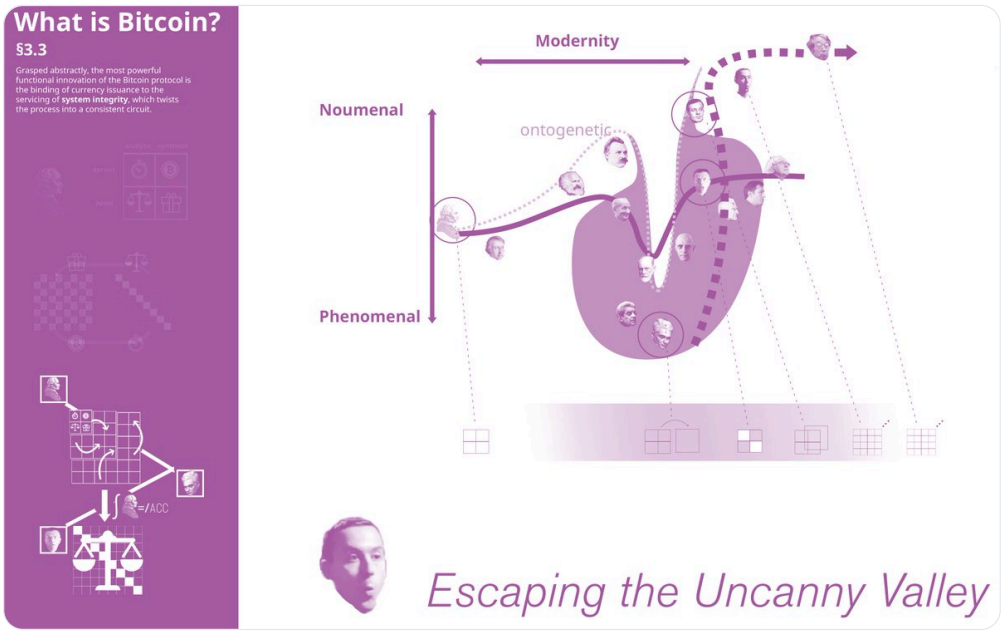
What is Bitcoin?
§3.3
Grasped abstractly, the most powerful functional innovation of the Bitcoin protocol is the binding of currency issuance to the servicing of system integrity, which twists the process into a consistent circuit.
Modernity
Noumenal
ontogenetic
Phenomenal

§3.3022
To escape the uncanny valley it is not sufficient to offer combinatoric remixing of the material possibilities (a purely spatial solution) lest this always be recaptured by differance

(dynamically reallocating the variables at play)
#cryptocurrrent #cryptocene #nickland



What is Bitcoin?
§3.3
Grasped abstractly, the most powerful functional innovation of the Bitcoin protocol is the binding of currency issuance to the servicing of system integrity, which twists the process into a consistent circuit.

Phenomenal
Escaping the Uncanny Valley

§3.3023
The escape velocity has to accelerate, has to reach the alchemical catalysis point that surges "past" modernity's horizonal belt and onto the Other side, the Outside. Is satoshi's solution, the machinic vector parastratifying atop of platformic schizoanalysis, enough?
